

Covid-19 Information

Northern Bedford County School District recognizes that information is important to our parents and community. As we continue to work our way through this process in the future, the information on the case status will be posted on the website and updated every Friday for the previous week under the COVID link on the district homepage. We are also providing you with definitions related to COVID along with the information we have related to COVID exposure each week.

Although the DOH is to complete contact tracing with COVID positive cases, the district will also be doing this work along with those that have COVID-like symptoms. Our goal is to ensure that the school buildings remain open this school year. To reach this goal, we are asking your help by refraining from sending your child to school if they exhibit symptoms referenced on the chart that can be found in the NBC operation plan or the State department of education website.

Definitions of Active Cases

Active Positive Case—someone who has a positive Covid-19 test and is currently in quarantine.

Active Close Contact Case—a person who has been within 6 feet of an active positive case, whether masked or unmasked, for 15 minutes or more and is currently in quarantine.

Active Suspected Case—an individual who is experiencing Covid-19 symptoms and is seeking medical attention and is currently in quarantine.

Active Suspected Close Contact Case—a person who has been within 6 feet of an active suspected case, whether masked or unmasked, for 15 minutes or more and is currently in quarantine.

Current Active Covid-19 Case Data

Please note the information in this chart consists of active cases as defined above. This is not a cumulative total.

Week 11/16/20 through 11/20/20	Number of Cases
Active Positive Case	8
Active Close Contact	41
Active Suspected Case	6
Active Suspected Close Contact	10
